Time: 4:30 pm

### **Prince William Sound Salmon Fishery News Release #23**

**SEINE FISHERIES:** An aerial survey of portions of the Eastern, Northern, and Southeastern districts was conducted on Monday, June 24. Early season indicators of wild stock chum and pink salmon escapement in these districts are ahead of anticipated numbers and support a wild stock fishery at this time.

VFDA began its 2013 pink salmon cost recovery program on Thursday, June 20, with pink salmon catches of 80 or fewer fish per set. Cost recovery fishing continued on Saturday, June 22, with pink salmon catches of 80 or fewer fish per set. There was no cost recovery fishing effort on Monday, June 24, although fishing resumed this morning with improved results. VFDA reports that cost recovery sets were yielding between 300 and 2,000 fish this morning. Information regarding June 24 cost recovery harvest information, including sex ratios and average weight will be provided in tomorrow's news release.

**EASTERN DISTRICT:** Waters of the Eastern District, south of the latitude of Black Point, will open to commercial fishing for 12 hours on Thursday, June 27 beginning at 8:00 am. Waters inside of the following Eastern District Salmon Harvest Task Force (SHTF) markers will be closed for this period to ensure early season escapement:

- (1) Sheep Bay: north of a line from a shore marker at approximately 60°41.13' N. lat., 145°58.87' W. long. to a shore marker at approximately 60°40.46' N. lat., 145°58.01' W. long.;
- (2) Beartrap Bay: north of a line from a shore marker at approximately 60°45.13' N. lat., 146°06.12' W. long. to a shore marker at approximately 60°44.51' N. lat., 146°04.57' W. long.;
- (3) Olsen Bay: north of a line from a shore marker at approximately 60°43.46' N. lat., 146°10.14' W. long. to a shore marker at approximately 60°43.21' N. lat., 146°13.97' W. long.;
- (4) St. Matthews Bay: north of a line from a shore marker at approximately 60°43.36' N. lat., 146°19.07' W. long. to a shore maker at approximately 60°43.61' N. lat., 146°21.17' W. long.;
- (5) Irish Cove: south of a line from a shore marker at approximately 60°46.73' N. lat., 146°26.62' W. long. to a shore marker at approximately 60°46.27' N. lat., 146°27.12' W. long.;
- (6) Landlocked Bay: waters north of 60°50.76' N. lat.;
- (7) Port Fidalgo Subdistrict: waters east of 146°24.12' W. long.

SHTF marker coordinates will also be available in the Cordova ADF&G office, and will be provided to area processors, VFDA and PWSAC for distribution to fishery participants. It is anticipated that early season fishing opportunities will be limited in frequency, with time and area for subsequent openers dependent upon escapement, harvest, effort, and VFDA cost recovery fishing progress. It is anticipated that the next Eastern District commercial fishing period will occur on Monday, July 1, with time and area to be announced at a later date. The Eastern District harvest estimate from the 14-hour period on Monday, June 24 is 15 Chinook, 237 sockeye, 49 coho, 92,800 pink and 3,300 chum salmon with 46 deliveries reported.

**SOUTHEASTERN DISTRICT:** Waters of the Southeastern District will open to commercial fishing for 12 hours on Thursday, June 27 beginning at 8:00 am. It is anticipated that early season fishing opportunities will be limited in frequency, with time and area for subsequent openers dependent upon escapement, harvest and effort. It is anticipated that the next Southeastern District commercial fishing period will occur on Monday, July 1, with time and area to be announced at a later date. The Southeastern District harvest estimate from the 14-hour period on Monday, June 24 is 80 Chinook, 929 sockeye, 148 coho, 54,400 pink and 3,500 chum salmon with 32 deliveries reported.

**SOUTHWESTERN DISTRICT:** On the east side of Knight Island, the waters of Marsha Bay, west of 147° 39.75' W. long., will open to purse seine fishing for an 84-hour period beginning at 8:00 am on Thursday, June 27, with an additional

60-hour period beginning at 8:00 am on Monday, July 1. This schedule is anticipated to remain in effect until further notice. Anadromous stream closures within Marsha Bay will not be in effect until further notice. These openings are intended to target a forecast return of 6,400 remote release sockeye salmon. These sockeye salmon have an average run timing of June 15 – August 1.

The AFK Hatchery THA and SHA will open to purse seine fishing at 8:00 am Thursday, June 27 for 84-hours, with an additional 60-hour period beginning at 8:00 am on Monday, July 1. This schedule is anticipated to remain in effect until further notice. Anadromous stream closures within the AFK Hatchery THA and SHA will not be in effect until further notice. The harvest estimate from the 84-hour period that ended on Sunday, June 23 is 8,100 sockeye, 2,630 pink, and 24,800 chum salmon with 69 deliveries reported. The cumulative Southwestern District commercial harvest to date is 19 Chinook, 13,400 sockeye, 1 coho, 461 pink, and 134,000 chum salmon. A total of 306,000 remote release chum salmon are forecast to return to the AFK Hatchery. The run timing for these chum salmon is from June 1 – July 27.

**The next scheduled salmon fisheries announcement is anticipated to occur by 2:00 pm Wednesday, June 26.**

Permit holders are advised that unscheduled announcements based on current escapement data may occur at any time inseason either establishing an additional period or extending an open period.

Announcement recordings are available for **gillnet fisheries at 907-424-7535 and seine fisheries at 907-424-7345. In addition, announcement recordings are available in Anchorage at 267-2843.**

Additionally, announcements, inseason harvest data, and escapement data are available at the following web addresses:

<http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareacopperriver.main> (Copper River homepage) or

<http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareapws.main> (Prince William Sound homepage).

Unless otherwise specified, all openings are clock openings based on Alaska Daylight Time, which is based on Coordinated Universal Time and may be obtained by calling 303-499-7111.

The department encourages commercial permit holders to renew their licenses early and to check their CFEC vessel registration stickers to make sure that they are current.

The department also encourages permit holders to report observed violations to Wildlife Safeguard at 800-478-3377. Reports are anonymous and cash rewards may be paid for successful prosecution of violations.

PWS commercial fishers are reminded that area fisheries often necessitate fishing in close proximity to marine mammals. Under the Marine Mammals Protection Act (MMPA), the PWS drift gillnet fishery is classified as a Category II fishery. Participants in Category I and II fisheries must be registered in the Marine Mammal Avoidance Program (MMAP) to be authorized for lawful incidental, but not intentional, marine mammal takes during fishing. However, this authorization explicitly does **not** exempt holders of commercial fishing permits from the MMPA prohibition on takes of marine mammals listed as endangered or threatened under the Endangered Species Act. As a participant in the PWS drift gillnet fishery you are automatically registered in the Marine Mammal Authorization Program (MMAP) by the National Marine Fisheries Service (NMFS). As a participant in a Category II fishery, you must:

- Maintain an MMAP Authorization Certificate, or a photocopy, on board the vessel while engaging in any of the fisheries identified on the reverse side of the certificate. For non-vessel or set net fisheries, the enclosed Certificate, or a photocopy, must be in the possession of the permit holder during fishing operations. This Certificate, in combination with a current, valid state or Federal fishing permit, will serve as your authorization to incidentally take non-endangered or non-threatened marine mammals in the course of commercial fishing operations.
- Report all injuries and mortalities of marine mammals within 48 hours of returning from the trip during which these takes occurred using the MMAP Mortality/Injury Reporting Form (visit [http://www.nmfs.noaa.gov/pr/pdfs/interactions/mmap\\_reporting\\_form.pdf](http://www.nmfs.noaa.gov/pr/pdfs/interactions/mmap_reporting_form.pdf) for a copy).
- If so requested, take an observer aboard your vessel.

Purse seine and set gillnet gear are classified as a category III fisheries under the MMPA. Category III fishery participants are automatically exempted from the incidental take prohibition in the MMPA. Therefore, you do not need to maintain the MMAP certificate aboard your vessel, but must report any incidental takes of marine mammals within 48 hours of the incident or your return to port. Such reports must be made on the Marine Mammals Authorization Program Mortality/Injury Reporting Form.

Because some marine mammals are also listed under the Endangered Species Act, incidental takes are also regulated under that act and are not authorized. **All** MMPA category fisheries are liable for incidentally taking ESA listed species.

Please reference [http://www.nmfs.noaa.gov/pr/pdfs/esa\\_factsheet.pdf](http://www.nmfs.noaa.gov/pr/pdfs/esa_factsheet.pdf) for a list of marine mammals currently listed under the ESA (you should periodically check with the National Marine Fisheries Service for any changes in listed species). Under the ESA, take means to “harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.” 16U.S.C. 1532(19); and harass means an “intentional or negligent act or omission which creates the likelihood of injury to the wildlife by annoying it to such an extent as to significantly disrupt normal behavioral patterns which include, but are not limited to, breeding, feeding, or sheltering.” (50 C.F.R. 17.3).

To reduce the possibility of incidentally taking an ESA listed species and its associated liability ADF&G recommends that:

- Fishermen participating in area fisheries remain vigilant in monitoring gear when marine mammals may be present.
- Fishermen use avoidance measures (e.g., not fishing or relocating fishing activities when marine mammals are present or likely to be present) to minimize interactions with marine mammals.
- Avoid fishing in areas where marine mammals are likely to be present at night or when visibility or weather conditions make it difficult to spot marine mammals.

For further questions concerning marine mammal regulations call NMFS at 907-271-5006.
